## SUMMARY

Motivated and results-driven software developer with expertise in Python and Django, I am passionate about building efficient, scalable web applications and solving complex problems. With a solid background in backend development, database management, API integration, and frontend collaboration, I thrive in dynamic environments that encourage innovation and teamwork. I am eager to leverage my skills to contribute to impactful projects and continually grow within a forward-thinking organization. My goal is to deliver high-quality, reliable solutions that meet both client and user needs, while consistently expanding my technical expertise.

---

## WORK

### EXPERIENCE

#### Freelancer

2023 - Present

- Web developer with a great understanding of design
- Built the logic for a streamlined ad-serving platform that scaled
- Build web applications that are scale and effective across every platform

#### Data clerk officer

National Election Commission of Liberia (NEC)

2020 - Sept 2021

- I served as a data clerk who entered new registrants's data.
